

PACKAGING SUSTAINABILITY STRATEGY

reece
group™

Reece is working to ensure product packaging is designed to reduce environmental impact.

Our aim is to eliminate unnecessary packaging and reduce its weight while continuing to deliver the quality products we're known for.

This comes together through:

1. Our people identifying opportunities.
2. Encouraging our customers to recycle and minimise waste.
3. Ensuring our suppliers choose the right materials.

Reece has aligned with Australia's 2025 National Packaging Targets, including:

- 100% of all Australia's packaging will be reusable, recyclable or compostable by 2025 or earlier.
- 70% of Australia's plastic packaging will be recycled or composted by 2025.
- 50% average recycled content will be included across all packaging by 2025.
- Problematic and unnecessary single-use plastic packaging will be phased out through design, innovation or introduction of alternatives.

To achieve these targets, Reece has committed to using the 10 Sustainable Packaging Principles as part of the Australian Packaging Covenant:

01

Design for recovery

02

Optimise material efficiency

03

Design to reduce product waste

04

Eliminate hazardous materials

05

Use recycled materials

06

Use renewable materials

07

Design to minimise litter

08

Design for transport efficiency

09

Design for accessibility

10

Provide consumer information on sustainability
